

How to associate RTC work items with SVN revisions:

Lukas Holy, Premek Brada - 2012

Work Item

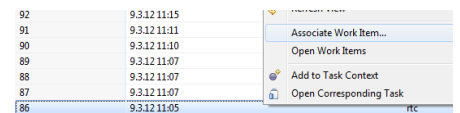

Associate from Work Item view
(Links tab) by adding URL to
repository:

- SVN+http working from eclipse
- http working on the web

Revision

Associate from revision:

- by adding „work item : <number> “
to revision comment
- by typing work item number into
form field during creating revision in
RTC eclipse client
- by associating in History view in RTC
eclipse client

- by adding URL to repository to
revision comment (does not create
an association, simply stores the link
text)
